

CROP INTELLIGENCE FARMGATE WEATHER

FARMGATE WEATHER INSIGHTS

SUBSCRIPTION INCLUDES:

- Key environmental insights at your fingertips on an easy to read "zone card"
- Localized weather forecast available for your individual stations
- Spray conditions function to give you a dashboard to quickly factor weather conditions into spraying decisions
- Visual historical graphs for Air Temperature, Precipitation, Humidity, Wind Speed to help you diagnose conditions for crop growth and disease pressure
- Create customizable alerts received by email or push notification to your phone for individual readings (i.e. temperature) or combination of readings (i.e. temperature and wind) from your weather station on your Crop Intelligence Mobile App
- Alerts can be created for: air temperature, soil temperature, delta t, humidity, precipitation, wind speed, leaf wetness, water driven yield potential, available water, moisture levels by sensor depth*
- Easily share your environmental sensor data with friends, family or neighbors with no additional fees.
